

Yamaha's Remote Doctor Makes House Calls!

You want to perform your best, in perfect health, and an occasional check-up helps keep you that way. Nobody knows you better than your own doctor.

It's the same with your YAMAHA SMT machines. That's why we're introducing new remote diagnostic tools that, like your doctor, analyze performance data already in your SMT machine and provide accurate feedback. No service call or interruption: it's a detailed report on your productivity, allowing you to optimize the operational efficiency (OEE) of your equipment.

This new service reviews and analyzes your data directly from your production line, letting you know about critical items that affect your overall productivity.

You get a rapid assessment of your line's real output over time, compared to its theoretical capability.

Want real time monitoring, diagnosing and optimization of your entire factory? Yamaha also offers a complete Factory Dashboard System.

Now you can make real-time, informed decisions:
You are in complete control.
